

VGA-GraphicMaster™

14" Color Monitor - Model CJ4681

Super-clear and remarkably crisp, the 14" VGA-GraphicMaster displays images of superb quality, perfect for graphical environments like Windows®, GEM® or Presentation Manager®. A black, non-glare screen and tight .31mm dot pitch keep everything from graphics to text razor sharp. Displays unlimited colors and includes a separate switch for text-mode display.

VGA 640 x 480 resolution vivid color display brings graphics to life. Images appear bold, bright and clear.

A black, 14" non-glare screen reduces fatigue and enhances readability.

Fully VGA compatible, provides an unlimited choice of striking bold and pastel colors, depending on your video adapter. Analog input compatible with all popular video standards and the IBM PS/2®. The horizontal scanning frequency is 31.5KHz and it includes a separate switch for text-mode display.
