

NAME

curl_share_strerror - return string describing error code

SYNOPSIS

```
#include <curl/curl.h>
const char *curl_share_strerror(CURLSHcode errornum);
```

DESCRIPTION

The curl_share_strerror() function returns a string describing the CURLSHcode error code passed in the argument *errornum*.

AVAILABILITY

This function was added in libcurl 7.12.0

RETURN VALUE

A pointer to a zero terminated string.
