

**Volume 15
1976**

Number One

Systems Network Architecture: An overview <i>J. H. McFadyen</i>	4
The transmission subsystem in Systems Network Architecture <i>P. G. Cullum</i>	24
The role of the Network Control Program in Systems Network Architecture <i>W. S. Hobgood</i>	39
The Virtual Telecommunications Access Method: A Systems Network Architecture perspective <i>H. R. Albrecht and K. D. Ryder</i>	53
LABS/7—a distributed real-time operating system <i>D. L. Raimondi, H. M. Gladney, G. Hochweller, R. W. Martin, and L. L. Spencer</i>	81
Penetrating an operating system: a study of VM/370 integrity <i>C. R. Attanasio, P. W. Markstein, and R. J. Phillips</i>	102

Number Two

Experiments in line quality monitoring <i>P. Bryant, F. W. Giesin, Jr., and R. M. Hayes</i>	124
HIPO and integrated program design <i>J. F. Stay</i>	143
Top-down development using a program design language <i>P. Van Leer</i>	155

Number Three

Design and code inspections to reduce errors in program development <i>M. E. Fagan</i>	182
Composite design facilities of six programming languages <i>G. J. Myers</i>	212
A model of large program development <i>L. A. Belady and M. M. Lehman</i>	225

Number Four

The Peterlee Relational Test Vehicle—a system overview <i>S. J. P. Todd</i>	285
Interactive modeling of computer systems <i>M. Reiser</i>	309
Service levels: A concept for the user and the computer center <i>L. J. Lewis</i>	328
An APL emulator on System/370 <i>A. Hassitt and L. E. Lyon</i>	358
